EXAMINER'S AMENDMENT

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 31, 2003 has been entered.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Julio Loza on January 21, 2004.

The application has been amended as follows:

- In Claim 10, line 1, delete "Claim 9" and replace with --Claim 3--;
- In Claim 17, line 13, delete "an adhesive plug" and replace with --a ceramic adhesive plug--.

Art Unit: 2871

3. The following is an examiner's statement of reasons for allowance: The prior art of record fails to specifically disclose a pressure vessel comprising a tubular outer casing that is capable of withstanding high temperature and pressure environments having a substantially cylindrical internal cavity and an opening in at least one end permitting access to the internal cavity, a plug region on the opening having a diameter greater than the diameter of the internal cavity along at least part of its length, a component in the internal cavity having at least a first lead required to exit the pressure vessel, and in particular, a high temperature, high pressure-resistant pressure fit-ceramic adhesive plug sealing against a length of the first lead passing through the plug shaped to conform to the plug region and sealing the opening when located there, where increased external pressure compresses the plug forcing it towards the internal cavity increasing the seal around the lead and around the plug region.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Y. Wang whose telephone number is 571-272-2304. The examiner can normally be reached on M-F, 8 am - 4:30 pm.
